- Why choose us?

WHO ARE WE?

PRESENTATION

The **Mohammed VI International University Hospital** is a non-profit multidisciplinary healthcare facility offering a wide range of medical care and services.

It is committed to education and research, with a particular focus on patient care, including investment in state-of-the-art medical technology.

The **Mohammed VI International University Hospital** ensures the teaching mission in partnership with the **Mohammed VI University of Health Sciences**. In its quest for excellence, it aims to build tomorrow's skills through medical and pharmaceutical clinical university and post-graduate education and participates in the practical training of nursing staff.

To promote access to medical excellence and facilitate the care of international patients, the hospital has an International Unit with a dedicated team.

The **Mohammed VI International University Hospital** offers global expertise, combining the most innovative investigation technologies, the most advanced treatment methods and tailor-made care on a single site.

OUR MISSIONS

- Provide high quality, specialized health care services to the patients who place their trust in us
- Ensure personalized and efficient care
- Put the best technology and the latest innovations to work for our patients.

WHO ARE WE?

OUR VALUES

COMMITMENT

Our employees have a sense of commitment. We are socially responsible and dedicated to the care of every patient, regardless of social class. We also take care of the environment through environmentally friendly processes.

EMPATHY

We listen to our patients and their families with care and patience to understand their needs and better meet their expectations for care and service.

INNOVATION

We create an environment that fosters the development of individual skills to encourage creativity and push the boundaries of knowledge. Every day we explore new avenues and innovative approaches to better serve our patients.

EXCELLENCE

We adopt a philosophy of permanent quest for perfection through training and sharing, and we all have the will to surpass ourselves in order to provide our patients with quality care that meets their requirements and ensures their full satisfaction.

ETHICS

Honesty and fairness are our code of conduct in everything we do. We treat everyone with respect and dignity and maintain confidentiality and privacy.

WHO ARE WE?

OUR ECOSYSTEM

WHO ARE WE?

THE HOSPITAL IN FIGURES

47000 sq. meters
Land area

325 Beds and spaces

15 Examination and treatment rooms

28 Consulting rooms

10 Operating theatres

More than **500** employees

+5000 Pieces of
equipment

WHO ARE WE?

THE PATIENT AT THE HEART OF OUR CONCERNS

The Mohammed VI International University Hospital offers its patients a care space that combines efficiency with pleasure and to its teams a working environment conducive to development and continuous improvement. At the Mohammed VI International University Hospital, the patient is at the heart of all our concerns. We put all the human and material means at your disposal for an optimal support and care. Whether it is the medical, biomedical, technical, or administrative staff, the entire team of the Mohammed VI International University Hospital works towards a common goal, that of making the passage or the stay of our patients, a pleasant experience. To achieve this, our mission is to provide patient-centered health care, with excellence in terms of service quality, support, and care.

Medical teams

Cover all major medical, surgical, and paramedical disciplines.

Health care teams

Nurses, care assistants, midwives, nursery nurses, dieticians, hospital porters, medical secretaries... ensure that the strictest quality standards are met.

Accommodation teams

Provide patients with the best conditions of comfort and hygiene.

Medical and technical teams

Participate with physicians in the development of diagnoses and the implementation of treatments.

Administrative teams

The administrative teams participate in the good organization of the reception of the patients and the services which are proposed to them.

Technical teams

Ensure patient safety within our facility.

WHY CHOOSE US?

Complete care, on the same site

- All major medical and surgical specialties at all ages
- A complete and state-of-the-art technical platform in one place (MRI, Scanner, Mammography, etc.)
- Pediatric and multipurpose resuscitation 24 hours a day, 7 days a week
- Emergency medical assistance service

Personalized follow-up

- Follow-up by the same doctor and anesthetist throughout the stay
- Increased presence of caregivers (nurses and nursing assistants)
- Specific support and assistance services for international patients

Quality and safety

- Latest generation equipment and innovative techniques
- Top-of-the-range hotel services (suites and single rooms, room service, etc.)
- Care in compliance with the standards of hygiene, quality and safety of patients and of their care environment

OUR CARE OFFERING

- 24/7 emergency care
- Specialized clusters and services
- Outpatient Services - Consultations
- Outpatient Services - Examinations
- Outpatient Services - Check-up
- Hospitalization service

24/7 EMERGENCIES

Immediate emergency management :

- Medical and surgical emergencies
- 24/7 access to medical and technical facilities
- Trauma resuscitation rooms for patients requiring heavy care
- Specialists on call 24 hours a day
- Management of polytrauma patients
- Neurosurgical emergencies
- 24-hour pediatric emergencies.

TRAUMA CENTER EMERGENCY CLUSTER

The Mohammed VI International University Hospital is equipped with a level 2 Trauma-Center according to the European classification. It houses:

- An emergency, trauma and orthopedic, anesthesia and extensive resuscitation (adult and pediatric) department
- All surgical specialties (neurosurgery, visceral surgery, etc.)
- Interventional radiology
- Means of mass transfusion
- Follow-up and Rehabilitation Care (FRC).

The Trauma Center has :

- 2 trauma resuscitation rooms
- 10 intensive care beds for short-term hospitalization
- 49 hospital beds

HEAD AND NECK CLUSTER

The Mohammed VI International University Hospital's Head and Neck Cluster of is oriented towards traumatic pathologies, in synergy with the Cheikh Khalifa International University Hospital. Among the different specialties related to this cluster :

Neurosurgery focuses on trauma injuries, including brain injuries, spinal injuries and peripheral nerve injuries.

ENT and maxillofacial surgery aims to develop techniques related to traumatic pathology. Thus, reconstructive surgery concerns both aesthetic and functional aspects. The techniques of treatment of deafness (cochlear implant) will be maintained initially at the Cheikh Khalifa International University Hospital.

Ophthalmology focuses on traumatic pathologies of the eye, especially those related to the posterior segment and retinal pathology.

In general, this cluster benefits from a complete integration of the various specialties available in the Trauma Center (anesthesia, blood bank, resuscitation) and a state-of-the-art technical platform (imaging, operating theatre) to meet its needs.

The Mohammed VI International University Hospital is equipped with a Woman - Mother - Child - Newborn - MAR cluster, which houses medical specialties from pregnancy to childbirth as well as neonatal and pediatric specialties and resuscitation.

Gynecology - Obstetrics:

The gynecology-obstetrics department offers care for pregnant women: pregnancy follow-up, obstetrical ultrasound, hospitalization of pathological pregnancies, preparation for birth and breastfeeding, postnatal consultations and perineal rehabilitation.

It also deals with cancerous diseases such as breast cancer with oncoplastic surgery and sentinel lymph node, surgery for cervical and uterine cancer, ovarian cancer, and endometrial cancer.

Surgery is also provided for benign diseases such as uterine fibroids, uterine prolapse, urinary incontinence, and other female diseases.

The gynecology-obstetrics department has a consultation unit, a delivery room with 6 large and modern single rooms, an operating theatre, and a 21-bed hospitalization unit.

All of these units work closely with the neonatology, radiology, pediatrics, biology, and resuscitation units.

Pediatrics Department:

- Pediatric emergencies
- Neonatal and pediatric resuscitation
- Neonatology
- General and primary care pediatrics
- Pediatric surgery
- Asthma Center
- Specialized consultations in pediatric nephrology and rheumatology
- Preparation of the social project with partners (mother-child nutrition).

Cluster of excellence in the management of respiratory diseases in infants and children:

- Management of viral bronchiolitis
- Management of viral and bacterial pneumonia in infants and children
- Creation of a Childhood Asthma Center
- Day hospital food allergy examination unit: Oral provocation tests, food reintroduction, and oral immunotherapy
- Development of the management of rare respiratory diseases
- Respiratory Functional Investigation Unit for Children
- Bronchial endoscopy
- The asthma school.

MAR – Medically-Assisted Reproduction

The Reproductive Medicine Department treats infertility pathologies and assists families with medically assisted reproduction projects.

- **AI** (Artificial Insemination): with the spouse's sperm
- **IVFET** (In Vitro Fertilization and Embryo Transfer)
- **ICSI** (Intracytoplasmic Sperm Injection)
- **IMSI** (Intracytoplasmic Morphologically Selected Sperm Injection)
- Freezing of embryos
- Techniques added to **IVF** or **ICSI**: extended culture, assisted hatching.

OUTPATIENT CHEMOTHERAPY

Personalized care, applying the most recent protocols in cancerology. Treatment of cancerous pathologies that do not require hospitalization.

Security :

- Reconstitution of cytotoxic products by specialized professionals, allowing nurses to focus on patient care
- Control of prescriptions by the pharmacy of the Mohammed VI International University Hospital

Intimacy :

- 7 individual boxes
- 18 armchairs with curtain separation
- 2 single rooms .

Comfort :

- All chemotherapy areas are equipped with TV sets..

ENDOSCOPY

Digestive endoscopy

The gastroenterology department of the **Mohammed VI International University Hospital** welcomes patients with digestive pathology. The gastroenterologists' functioning within groups enables most of the aspects of gastroenterology to be taken care of, with:

- Daily consultations and a 24/7 on-call service for patients followed or hospitalized in the establishment
- Endoscopic activity: gastroscopies, colonoscopies and video-capsules
- Realization of digestive ultrasound
- Interventional endoscopy activity including: biliary tract procedures, stone extractions and biliary prosthesis with or without prior echo-endoscopy, digestive, esophageal, duodenal, biliary or colonic stenting (prosthesis).

A new generation sterile cluster

The **Mohammed VI International University Hospital** is ahead of the standards and obligations of the international recommendations of learned societies by opening a sterile cluster for washing, drying, and storing heat-sensitive endoscopes. It offers several advantages:

- It contributes to the reliability of the traceability of care thanks to the storage of heat-sensitive endoscopies in enclosures that guarantee decontamination for 72 hours
- It helps to improve the working conditions of the caregivers (easy maintenance)
- It respects the environment because it saves a maximum of 2 washes per tube.

ENDOSCOPY

Technical platform

Thanks to its high-performance technical platform, the Mohammed VI International University Hospital provides care for a large number of aspects of gastroenterology, from diagnosis to treatment of diseases of the digestive tract (esophagus, stomach, small intestine, and colon), liver, bile ducts, and pancreas.

By equipping its two endoscopy rooms with the latest generation of equipment, the hospital is improving the quality and safety of care for both patients and caregivers:

- An improved patient care pathway (wards located close to the department), thus allowing care from diagnosis onwards, including in emergencies
- Perfect control of the endoscopic process
- Greater availability of the equipment (24/7) thanks to the storage cabinets allowing the nursing staff to develop their field of intervention by optimizing their schedule.

ANAESTHESIA - RESUSCITATION

Anesthesia and perioperative care :

- Pre-anesthetic consultations
- Anesthesia in the operating theatre, in delivery rooms and in technical platforms
- Endoscopy, interventional radiology and Medically-Assisted Reproduction
- Perioperative care
- 24/7 surgical and obstetrical emergencies.

24-HOUR RESUSCITATION

- In a multipurpose resuscitation unit
- In case of an emergency within the hospital.

CARDIOLOGY

Heart and vascular problems

- Diseases of the coronary arteries, heart muscle, heart valves, pericardium, and blood vessels
- High blood pressure
- Congenital heart disease.

OUTPATIENT SURGERY

- Dermatological surgery
- General and digestive surgery
- Gynecological surgery
- ENT Surgery
- Orthopedic surgery
- Ophthalmic surgery
- Pediatric surgery
- Peripheral neurosurgery.

GENERAL AND DIGESTIVE SURGERY

Pathologies of the digestive system (esophagus, stomach, intestine, colon, rectum, anus), pathologies of associated glands (liver, pancreas, spleen, adrenal gland), repair of the abdominal wall (inguinal hernia)

- Digestive oncology
- Obesity pathology (sleeve gastrectomy, gastric bypass)
- Hernial pathology
- Biliary pathology
- Gastroesophageal reflux disease
- Liver and pancreas pathology
- Proctological pathology.

- 1 Mobile scanner
- 1 Refractive surgery platform
- 64 Resuscitators
- 14 Anesthesia ventilators

DENTAL

Soins dentaires et chirurgie orale

- Oral surgery
- Implantology: dental implants, prostheses on implants
- Endodontics
- Orthodontics
- Pediatric dentistry
- Periodontics.

DERMATOLOGY

Diseases of the skin, mucous membranes, scalp, and nails

- Common dermatological pathologies: eczema, psoriasis, skin infections, toxidermia, bullous dermatoses...
- General pathologies with dermatological expression (lupus, vascularity...)

ENDOCRINOLOGY - DIABETOLOGY

Endocrinology :

- Thyroid pathologies (nodules, goiter, hypothyroidism and hyperthyroidism)
- Pathologies of puberty and growth
- Adrenal pathologies (hyperpilosity, Addison's disease, Cushing's syndrome, ...)
- Pituitary pathologies (pituitary adenoma, corticotropic insufficiency after corticosteroid therapy, diabetes insipidus,...)
- Metabolic pathologies (hypercholesterolemia, hypertriglyceridemia, hypertension, overweight...) .

Diabetes :

- Type 1 and type 2 diabetes
- Gestational diabetes.

GASTROENTEROLOGY, HEPATOLOGY AND PROCTOLOGY

Management of digestive system diseases with access to recognized and innovative treatments.

Advanced digestive examinations :

- Diagnosis and medical treatment of diseases of the digestive system (digestive endoscopy)
- Management of chronic inflammatory bowel disease - video capsule, and enteroscopy.
- Digestive oncology (specific diagnosis and advanced treatment)
- Medical and surgical proctology
- Nutrition and obesity management
- Interventional therapeutic endoscopy (echo-endoscopy, biliary and pancreas catheterization)
- Digestive emergencies.

Maternity, infertility, Medically-Assisted Reproduction (M.A.R.), gynecological functional disorders, genital and urinary infections, cancerology...

Medical Gynecology:

- Functional disorders:
 - Hormonal problems
 - Functional menstrual disorders
 - Pathologies of adolescence
 - Pelvic pain syndrome
- Genital and urinary tract infections
- Contraception
- Breast examination
- Osteoporosis assessment
- Menopause with hormonal evaluation.

Cancer surgery :

- Screening and treatment of breast, uterine and ovarian cancers

OBSTETRICS AND GYNECOLOGICAL SURGERY

Gynecological surgery

- Surgery under hysteroscopy: uterine fibroids, uterine polyps, uterine synechiae, endometrectomy, tubal sterilization
- Hysteroscopic or laparoscopic fibroid surgery
- Cervical surgery (laser conization)
- Total or subtotal hysterectomy with or without ovarian conservation, by hysteroscopy or laparoscopy
- Ovarian surgery: removal of cysts and tumors
- Fertility surgery: tuboplasty, destruction of endometriosis, removal of adhesions...
- Surgery for pelvic endometriosis
- Surgery for urinary stress incontinence
- Surgery of pelvic static disorders by laparoscopic, natural or mixed approach: genital, bladder or rectal prolapse.

HEMATOLOGY – ONCOLOGY

Hématology :

Among the hemopathies, there are cancers, which are called hematological cancers :

- Lymphoma
- Leukemias
- Myeloma
- Other blood diseases...

Oncology :

- Tumors (brain, ENT, endocrine, lung, gynecological, prostate, digestive tract...)

INTERNAL MEDICINE

Internal medicine is a versatile specialty that deals with the internal organs (such as the heart, lungs, digestive system, etc.).

- Diagnosis and comprehensive management of adult diseases
- Systemic diseases
- Autoimmune diseases
- Complex and rare cases.

PHYSICAL MEDICINE AND REHABILITATION

Physical and rehabilitation medicine takes care of people with a disability or physical incapacity (as a result of an illness or accident), in order to minimize the consequences of this deficit on their daily life.

The therapeutic field of physical medicine and rehabilitation is very broad :

- Multiple sclerosis
- Parkinson's disease
- Cerebrovascular accident (CVA)
- Paralysis
- Amputation
- Neuromuscular diseases
- Chronic pain
- Heart failure
- Delays in walking
- Language disorders...

Physical and rehabilitation medicine also takes care of the aftermath of an accident, a joint prosthesis or an apparatus, or even sportsmen and women who have suffered injuries.

- 1 Robotic gait rehabilitation device.
- 1 Balance and posture assessment device
- 1 Motion Analysis Laboratory

NEUROLOGY

Diagnosis and treatment of diseases of the brain, spinal cord, peripheral nerves and muscles.

- Vascular diseases: strokes, transient ischemic attacks (TIAs)
- Degenerative diseases (Alzheimer's, Parkinson's...)
- Central nervous system pathologies: epilepsy (clinical assessment; electroencephalogram); multiple sclerosis and vasculitis; brain tumors
- Pathologies of the peripheral nervous system (polyneuritis, sciatica) and muscle diseases
- Migraines and headaches.

NEPHROLOGY - NEPHROPEDIATRICS

Nephrology

- Acute or chronic renal failure
- Renal colic
- Proteinuria (presence of protein in the urine)
- Hematuria (blood in the urine)
- Nephritic syndrome
- Glomerulonephritis
- Recurrent urinary tract infections.

Pediatric nephrology

- Acute or chronic kidney disease
- Nephrotic syndromes (proteinuria)
- Developmental abnormalities of the kidneys or urinary tract (small kidneys, uropathy)
- Genetic kidney diseases
- Renal pathologies of infectious or immunological origin (lupus)
- Kidney stones and other causes of hematuria
- Metabolic diseases with renal involvement
- Renal failure (acute or chronic), regardless of cause
- High blood pressure.

OPHTHALMOLOGY AND OPHTHALMIC SURGERY

Diagnosis and treatment of all eye diseases

Anterior segment of the eye:

- Cataract
- Glaucoma, corneal pathologies
- Refractive disorders (myopia, hyperopia, astigmatism, presbyopia)

Posterior segment of the eye:

- Retinal diseases (including age-related macular degeneration or AMD)
- Vitreous diseases.

Ophthalmology-pediatrics:

- Childhood vision disorders
- Strabismus
- Eyelid and tear duct disorders.

Surgeries performed:

- Cataract surgery
- Glaucoma surgery
- Refractive surgery
- Retinal and vitreous surgery
- Tear duct surgery
- Eyelid pathologies.

E.N.T. AND FACE AND NECK SURGERY

Conditions affecting the ear, face, nose, sinuses, throat, neck and border regions

- Ear disorders (otitis, chronic otitis, persistent pain, decreased hearing or a feeling of blockage, whistling, ringing in the ears)
- Nose and sinus disorders (sleep apnea, snoring, loss of smell, allergic manifestations)
- Throat and larynx disorders (difficulty swallowing, breathing, swelling)
- Abnormal lumps and swellings
- ENT cancers
- Dizziness
- Facial paralysis.

Surgeries performed:

- Surgery for deafness
- Endoscopic salivary gland surgery

ORTHOPEDICS AND ORTHOPEDIC SURGERY

Pathologies of the locomotor system (diseases or injuries affecting bones, joints and their ligaments, muscles or tendons, nerves...)

Orthopedics and Orthopedic Surgery:

- Orthopedics and traumatology of the elderly, adults and children
- Joint surgery: hip, knee, ankle, shoulder, elbow, wrist...
- Hand surgery
- Peripheral nerve surgery
- Spinal surgery
- Foot surgery
- Arthroscopy.

PEDIATRICS

Treatment of all children's pathologies, from birth to 18 years of age.

General pediatric consultations and vaccinology

Pediatric specialty consultations:

- Pneumo-allergology
- Diabetes - Endocrinology
- Nephrology
- Rheumatology
- Neuropediatrics
- Gastroenterology and nutrition
- Early childhood development.

PNEUMOLOGY

Respiratory pathologies, sleep apnea syndrome

- Chronic respiratory diseases: asthma, bronchial dilatation, chronic obstructive pulmonary disease (COPD), chronic respiratory failure
- Malignant and benign lung tumors
- Acute pathologies: pulmonary, pleural, infectious, immuno-allergic, vascular...
- Sleep apnea syndrome.

RHEUMATOLOGY

Diseases of the spine, rheumatism, bone and joint diseases of the limbs.

- Osteoarthritis, polyarthritis
- Tendon and muscle pain
- Bone, tumor and infectious diseases
- Osteoporosis, fractures, and vertebral compression
- Rheumatoid arthritis
- Psoriatic arthritis
- Interventional rheumatology
- Spine
- Sciatica
- Treatment of herniated discs.

UROLOGY

Kidney, urinary tract and male genital diseases

- Diagnosis and treatment of all urological cancers: prostate, bladder, excretory ducts, kidneys, testicles
- Infections after adenoma
- Male sterility
- Erectile Dysfunction
- Female urinary incontinence and prolapse
- Andrology.

EXAMINATIONS

The examinations cover several specialties:

Cardiology, Dermatology, Endocrinology, Neurology, ENT, Ophthalmology, Pneumology...

Each of these specialties encompasses various examinations.

Cardiology :

- Stress echocardiography table
- Multi-sound cardiac ultrasound
- Holter blood pressure
- Holter / ECG monitoring.

Dermatology :

- Platform
- Laser treatment of pigmented lesions and tattoos
- Alexandrite and ND YAG laser
- CO2 Laser

Endocrinology :

- Body mass analyzer

EXAMINATIONS

Neurology :

- Electro-encephalogram (EEG with camera)
- Electro-Myogram (EMG) with integrated auditory and visual evoked potential

ENT :

- Video Nystagmography (VNG)
- Vestibular testing
- Ultrasound examination
- Audiometry.

Ophthalmology :

- Goldmann visual field
- Retinal Angiography
- UBM / Ultrasonic Biomicroscopy
- Optical Coherence Tomography (OCT)
- Corneal topography
- Diagnostic station for refractive surgery
- Synoptophore for orthoptics.

Pneumology :

- Spirometer
- Plethysmograph with integrated DLCO module and provocation

CHECK-UP

The Mohammed VI International University Hospital check-up service is a center dedicated to preventive medicine and screening, allowing early treatment and better management of any unidentified, silent or even unknown pathologies.

General check-up :

- Cardio vascular check-up
- Gynecological check-up
- Dietetic assessment to advise and supervise the quality of your food according to your needs.

Smoking check-up :

- Cardiovascular exploration
- Complete respiratory exploration
- Smoking cessation consultation

Overweight check-up :

- Impact report
- Personalized dietary advice

Sports check-up :

- Check your body's ability to withstand physical effort

Senior check-up :

- General medical check-up
- Complete cardiac and vascular exploration
- Osteoporosis screening

Company check-up :

- Because the good health of the company also depends on that of its human capital, the hospital's check-up service offers health checks adapted to company executives and employees.

- **Check-up matinée :**

For patients asking for, there is also a Morning check-up that takes place over half a day and which is a quick and personalized health check-up.

OUTPATIENT HOSPITALIZATION

Outpatient hospitalization (also called "Day Hospital") is a mode of hospitalization allowing the patient to be taken care of during the day and to return home the same day.

Outpatient hospitalization is booming in many disciplines: Vascular, Ophthalmology, Orthopedics, General and Digestive Surgery, ENT, Gynecology, Pediatrics.

It is also an alternative to full hospitalization for a large number of diagnostic and/or interventional procedures, performed under anesthesia :

- Endoscopy (gastroscopy, colonoscopy, bronchoscopy)
- Angiography and coronary angiography
- In-vitro fertilization procedures under anesthesia.

- **Day hospital surgery** : The DH surgery has 27 places including 8 stretcher chairs, 2 individual rooms and 17 beds.
- **Chemotherapy day hospital** : The chemotherapy day hospital has 25 places including 1 room with 18 chairs and 7 individual boxes.
- **Medicine day hospital** : The medicine day hospital has 10 seats.

FULL HOSPITALIZATION

Full hospitalization, usually scheduled, includes at least one night in hospital.

Full hospitalization offers a certain comfort to the patient:

- Double, single or suite rooms
- Private bathroom
- Air conditioning
- Phone
- Smart TV
- Wireless internet access (Wi-Fi).

The work organization of the care units favors the availability of the caregivers to the patient.

Trauma-center hospitalization:

The **Mohammed VI International University Hospital** has 2 Trauma Center units which are divided as follows

■ Trauma Center Unit 1:

Capacity of 26 beds including 8 orthopedic beds, 2 VIP rooms, 10 single rooms, 2 double rooms and 2 isolation rooms.

■ Trauma Center Unit 2:

Capacity of 22 beds including 2 VIP rooms, 10 single rooms, 4 double rooms and 2 isolation rooms.

SERVICE HOSPITALISATION

Gynecology and obstetrics hospitalization:

This structure has 20 beds, a nursery and a childcare area.

Medical and surgical hospitalization:

This section has 2 units with a total bedding capacity of 35 beds.

Pediatric hospitalization:

It has a capacity of 39 beds, a playground, and a general playful environment adapted to children patients.

Oncology hospitalization:

It has 29 beds shared between 13 single rooms, 6 double rooms, 2 isolation rooms and 2 VIP suites.

VIP hospitalization:

This section offers high standard accommodation and ancillary services and has 12 Gold suites.

MEDICAL AND TECHNICAL SERVICES

- Laboratory
- Radiology

MEDICAL AND TECHNICAL SERVICES

The medical and technical services of the Mohammed VI International University Hospital are made up of medical and non-medical health professionals and are divided into different units:

- Medical Laboratory Unit
- Medical Radiology Unit.

These units are service providers for both the other clinical clusters and the public.

Each department has a unit manager assisted by practitioners and specialist staff as well as administrative staff.

LABORATORY

The laboratory of the Mohammed VI International University Hospital covers all biological disciplines

- Current biochemistry
- Hematology, hemostasis
- Bacteriology
- Anatomopathology
- Routine and specialized immunology
- Assays for prenatal diagnosis of the Down's Syndrome
- Assays for medically-assisted reproduction

Some tests must be performed on an empty stomach. In case of doubt, contact the laboratory secretariat.

RADIOLOGY

MRI

- Magnetic resonance imaging, using the magnetic properties of the human body, non-irradiating and without risk for the patients
- Reference imaging for the examination of a large number of organs: central nervous system, joints, liver, bile ducts, pancreas, ENT, prostate, women's imaging (breasts and pelvis)
- Oncology: from simple diagnosis to assessing the severity of a tumor.

Scanner

- Lung, musculoskeletal, neurological, urinary system, child scan
- Oncology: Diagnosis of cancers (lung, breast, colon, etc.) and monitoring of treatment effectiveness
- Arthroscan
- Angioscan of the aorta, neck vessels and lower limbs
- Colon scan (virtual colonoscopy)
- Heart and coronary artery scan
- Interventional: infiltration, puncture, drainage under CT scan guidance.

Mammography

- Breast Cancer Screening.

RADIOLOGY

Ultrasound

- Abdominal, urinary tract, pelvic, breast, musculotendinous, cervical, thyroid, testicular and prostate ultrasound
- Cervico-encephalic ultrasonography Doppler.

Interventional Radiology

- Use of imaging equipment to guide treatments deep into the human body without opening the body.

Panoramic dental X-ray system

- Global view of the jaw in order to know the exact location of the teeth, to identify various dental anomalies, and to detect dental and tissue lesions.

Treatment of many pathologies without surgery

- Vascular pathologies: Treatment of blocked arteries or veins, aneurysms, deep varicose veins, embolization of arteries in case of external or internal bleeding
- Oncology: chemoembolization by charged microbeads (administration of anticancer drugs directly into the tumor), tumor destruction by radiofrequency, treatment of tumor obstructions by placing drains or prostheses.
- Gynecology: uterine artery embolization in case of hemorrhage after childbirth, treatment of uterine fibroids by embolization.

In addition to surgical procedures

- Drainage of deep thoracic or abdominal collections or abscesses, without the need for further surgery.

- 1 Remote-controlled digital table
- 2 Digital tables for conventional radiology

FREQUENTLY ASKED QUESTIONS (FAQS)

Medical records & patient information requests

How can I get a copy of my medical record?

In order to protect the confidentiality of medical data, it is imperative to send us a written request, written by the patient (or signed by him/her) accompanied by a photocopy of his/her identity card. This written request must include the last name, first name, date of birth and the departments in which the patient has stayed as well as the approximate dates of his or her stays at the **Mohammed VI International University Hospital**. The desired copies will be sent to you personally within fifteen days of receiving your request in due form.

Here is where to send your request:

- Either to the Secretariat of the Medical Department

Mailing address:

To the attention of the Medical Department
Mohammed VI International University Hospital
Route P3011 Bouskoura
Casablanca, Morocco

- Or to the Archives Department

Mailing address:

To the attention of the Archives Department
Mohammed VI International University Hospital
Route P3011 Bouskoura
Casablanca, Morocco

How can I access my medical file or receive my hospital reports?

The hospitalized person (or his or her legal representatives in the case of a minor or a protected adult) has direct access to health information concerning him. Under certain conditions, in the event of death, the person's legal representatives may also have access to certain elements of the patient's medical record.

FREQUENTLY ASKED QUESTIONS (FAQS)

Medical records & patient information requests

I have a question about my treatment, whom should I contact?

You decide what care you choose to receive, and as such, you are free at any time to accept or refuse a treatment (except in case of life-threatening emergency). Doctors are qualified to determine the most appropriate treatment for you. They must inform you of this: do not hesitate to ask them or to ask the care team.

I have an administrative question about my admission or the cost of my stay.

The admissions and accommodation expenses office is at your disposal for the administrative management of your hospitalization.

Is there a welcome booklet for my hospital?

A welcome booklet will be given to you on your arrival in your room. It is intended to facilitate your stay in the hospital. You will find all the practical information you need, concerning the steps to be taken, the services at your disposal, your rights, or the rules of living together.

Who can I contact for information and advice on my social situation?

Social workers are present in each of our departments to respond to your requests and accompany you in your care. You can ask for their contact details from the professionals in your care unit.

Where can I find out about my post-hospital care?

Whether you are continuing your care in another health care facility or returning home, you can prepare for further care with the help of our teams.

FREQUENTLY ASKED QUESTIONS (FAQS)

Consultations

Why do I have to show my ID card at every consultation?

Your safety is at stake! The presentation of your identity card allows the medical secretary to identify you correctly and to check the accuracy of your personal data in order to avoid any risk of error.

Why are consultations sometimes delayed?

As the medical diagnosis cannot be established at the time of making the appointment, it is difficult to estimate the exact duration of each consultation. The schedule is therefore subject to change throughout the day. This can cause delays and extend your wait. We apologize for this. *Our wish is to help you to the best of our ability. If you can't wait, make a new appointment with our medical secretary.*

What can I do to alleviate the delay in consultation?

The consultation is a privileged moment between you and the doctor. Get to the point: explain your case in a precise manner so that the doctor can take care of you in the best possible way. Discussing the health problems of relatives cannot be done in the context of your consultation. If necessary, invite the persons concerned to make an appointment.

Where can I drop off the CD or result sheets from my previous tests?

Leave any you may have with the receptionist. He or she can attach them to your patient file. Do not forget to give those CD-ROMs or results sheets to the receptionist before seeing the doctor : this will save you time during the consultation.

FREQUENTLY ASKED QUESTIONS (FAQS)

Will I receive a copy of the lab results?

The **Mohammed VI International University Hospital** will give you a copy of your laboratory results only if the prescribing physician has explicitly requested it on the prescription. Otherwise, no advice or interpretation will be provided directly to patients by the sampling center or laboratory.

These results require an interpretation that only your prescribing physician will be able to provide.

Food and accommodation

Where to eat?

Visitors have access to a cafeteria with sandwiches, drinks, and snacks.

Where can I find accommodation near **Mohammed VI International University Hospital**?

Various hotels are also located in the vicinity of the **Mohammed VI International University Hospital**.

FREQUENTLY ASKED QUESTIONS (FAQS)

Access and parking

What time do the main doors close?

There are parking lots on the hospital grounds reserved for pregnant women and emergency cases. Parking is also available along the road.

Are there any parking lots? Where are they located?

There are parking lots on the hospital grounds reserved for pregnant women and emergency cases. Parking is also available along the road.

Where can I find a wheelchair to move around the hospital?

Wheelchairs are available to patients at the main entrance in the central hall.

Other

What shops can be found in the hospital?

On the ground floor of the Mohammed VI International University Hospital, there is a parapharmacy and a shop. You will find: groceries, fresh products, books and newspapers, flowers, toys, gifts for children and adults, batteries, hygiene articles... Payment by card is accepted.

Where can I find a pharmacy (dispensary)?

There are several pharmacies in the vicinity of the hospital. They are located only a few meters away. Please note: by law, all medicines administered in hospital must be dispensed by the Hospital's Central Pharmacy.

External retail pharmacies therefore only dispense medicines to be used outside the hospital.

FREQUENTLY ASKED QUESTIONS (FAQS)

Autres

Can I use my mobile phone at the Mohammed VI International University Hospital?

The use of mobile phones is tolerated in the hospital. However, we invite you to use it sparingly to preserve the quietness of the hospital and to respect the people who could be disturbed by your telephone conversation.

Can I connect to the internet for free at Mohammed VI International University Hospital?

The Mohammed VI International University Hospital offers free WiFi access to patients, visitors and staff: "HM6-VISITEUR".

How to connect ?

The wireless network signal is automatically detected by your laptop, tablet, or smartphone. You may log in to the "HM6-VISITEUR" network with any device that has the "WiFi" functionality.

After registering and accepting the Terms of Use, you can access the Internet to surf, read your e-mails, etc.

More information

Consult the General Conditions of Use of the WiFi network "HM6-VISITEUR".

Important note

The Mohammed VI International University Hospital offers internet access via "HM6-VISITEUR" but declines all responsibility for the functioning of the wireless network and may not be held responsible for any malfunctioning of the network.
